

**Science Engagement Office - March Break Science and Engineering Camp  
Posted Feb 26, 2016**

00:02

I like science because it helps us

00:10

understand what's going on I like to

00:13

have a challenge so science is a great

00:17

balance of the fun things in life and

00:21

the more difficult things I find it

00:24

really cool being able to like learn

00:26

about the things that happen around us

00:27

how the world works I'm like how will be

00:30

able to shape the future one day I think

00:34

this can because it has lots of people

00:38

and they all have a passion for science

00:41

let's can click on to its been like um I

00:44

guess more like a school environment

00:46

where you don't want to talk with your

00:48

peers as often and if you like drop we

00:52

had a little bit more individual but i

00:53

like how we do a lot of productivity

00:55

like almost all back to me we've done

00:57

with it in groups and like if you go to

01:00

a camp in you have no friends like you

01:01

don't

01:02

it nice to be able to meet people at

01:06

school a lot of people like a lot of

01:09

different things but here it's all of

01:12

the kids that like science so it's easy

01:15

to get along with people because we

01:17

share interests to create atmosphere

01:20

it's way more fun than squirrel squirrel

01:23

has too many rules I expected it to be

01:27

not so much fun print amore bum and I

01:31

respected it so that's very good Kim

01:37

showed me that there is much more to

01:40

science than I actually think there is

01:45

this camp has i would definitely opened

01:48

up my mind to like a lot of different

01:50

possibilities within like

01:52

he was in science I would say that

01:53

coming to this camp house giving me like

01:55

a bigger opportunity of knowing the

01:58

different branches of science and like

02:00

kind of pinpointing like the main once I

02:03

wanted like going to I think that

02:05

everybody what the passion for science

02:07

should come to this camp and i hope to

02:10

be here maybe in four years for

02:13

university

02:19

I would recommend this camp to anybody

02:23

who like science or even who doesn't

02:25

Houston science medicine or if you're

02:28

just love interested in learning a new

02:30

thing please show many different topics

02:33

so they can explore all of science which

02:35

is an overall amazing topic
